Conclusions

1H11 results

- Good results for the first six months in a tough environment
- Some positive trends may be sustainable given the current market conditions, e.g.:
 - growing net margins in consumer and retail banking
 - loan growth in corporate/consumer finance
 - banking net profit growth driven by upturn in RPB
- Global macro environment still tough and unhelpful to banking businesses
- Mediobanca well-positioned in banking sector, due to its low refinancing requirements, high liquidity, sound core Tier 1 ratio and business model already Basel III-compliant
